(54) Title: EFFECT PAINT

(57) **Abstract:** Emulsion paint composition for obtaining special textile or suede effect comprising a filler at least partly consisting of pre-pigmented spherical aliphatic polyurethane particles. About 3 - 10% of the spherical particles has a particle size between 63 - 90 micrometers and 25 - 40% of the spherical particles has a particle size between 40 - 63 micrometers. Before applying the paint as a semi-opaque top coat the substrate is first coated with an opaque acrylic primer of a corresponding colour and subsequently dried. The top coat is applied by brush in cross way fashion to obtain a suede effect, or it can be applied by roller, while subsequently a tool is used comprising a flat side provided with stiff parallel projecting fibres such as synthetic grass fibres, which are dragged over the fresh paint layer to obtain a linen effect.
